

## Your partner in sheet metal working and roll forming machines

★ *For over 20 years, Pasterkamp Metal Sheet Solutions has been supplying custom machines for sheet metal working from coil worldwide. We are an internationally recognized specialist in roll forming technology, for both narrow profiles and wide panels*

- **Roll forming:** from small profiles to wide panels
- **Cutting, punching, slitting and stacking**
- **Laser and plasma cutting, deburring, pressing, folding** and more

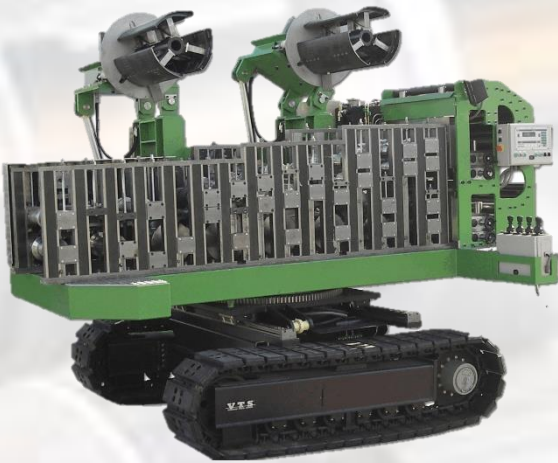

We are happy to advise you in choosing the perfect machine for your production needs, including full service and maintenance.

## Mobile, flexible and efficient

Our in-house designed and manufactured mobile roll forming machines are ideal for **on-site production** of gutters and profiles.

Our mobile roll formers can be transported on trucks, if necessary mounted on caterpillar tracks

## Horticulture and solar energy applications ★

Our roll forming machines are widely used in horticulture, greenhouse construction and the solar energy sector. They offer efficient solutions for producing various types of gutters and profiles, directly on site.

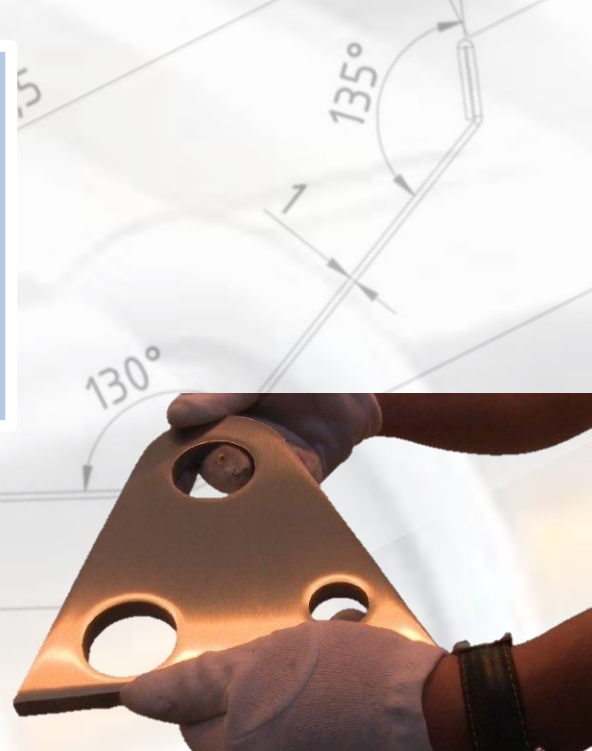

## Innovation and collaboration

At Pasterkamp, collaboration and customization are key. We work closely with our customers to design the perfect machine. Based on your drawings, quantities and desired production speeds, we create a machine that seamlessly connects to your production process.

## Why Pasterkamp?

- More than 20 years of experience
- Worldwide delivery and service
- Specialist in customized solutions
- Full service and maintenance

★ *Contact us today and discover how we can take your production to the next level!*
